

CLARIFICATIONS TO AMS-III.I AVOIDANCE OF METHANE PRODUCTION IN WASTEWATER TREATMENT THROUGH REPLACEMENT OF ANAEROBIC SYSTEMS BY AEROBIC SYSTEMS

Publication date: 05 July 2024

This document provides clarifications applicable to any version of the CDM methodology [AMS-III.I Avoidance of methane production in wastewater treatment through replacement of anaerobic systems by aerobic systems](#) when used by a project in Verra’s Verified Carbon Standard (VCS) Program. Such clarifications are effective on their issuance date. Project proponents and validation/verification bodies (VVBs) shall apply and interpret AMS-III.I consistent with the clarifications set out in this document.

| Correction / Clarification | Description | Document and Section Reference | Effective Date |
|----------------------------|---|--|---|
| Clarification 1 | References to the <i>2006 IPCC Guidelines for National Greenhouse Gas Inventories</i> must be replaced by the latest version of the IPCC Guidelines for National Greenhouse Gas Inventories | All relevant sections in the methodology | Effective immediately, including all project requests currently in the Verra project review process |

CLARIFICATION 1

Clarification:

All references in the methodology to the *2006 IPCC Guidelines for National Greenhouse Gas Inventories*, including MCF values listed in table III.I.1, must be replaced by the latest version of the *IPCC Guidelines for National Greenhouse Gas Inventories* or any refinements to it.

Background:

This clarification aligns with the *VCS Standard v4.7*, which states that “*where external documents are referenced (e.g., The 2019 Refinement to the 2006 IPCC Guidelines for National GHG Inventories), and when such documents are updated, the most recent version of the document shall be used.*”
