

VCS Monitoring Report Template

*This template is for the monitoring of VCS projects.*

Instructions for completing the monitoring report:

*TITLE PAGE: All items in the box at the bottom of the title page must be completed using Arial 10pt, black, regular (non-italic) font. This box must appear on the title page of the final document. Monitoring reports may also feature the monitoring report title and preparers' name, logo and contact information more prominently on the title page, using the format below (Arial 24pt and Arial 11pt, black, regular font).*

*MONITORING REPORT: Instructions for completing the monitoring report template are given under the section headings in this template. All instructions must be followed, as set out in the VCS Standard. Instructions relate back to the rules and requirements set out in the VCS Standard and accompanying program documents. As such, this template must be completed in accordance with such documents, and the preparer will need to refer to the VCS program documents and the methodology in order to complete the template. It is also expected that relevant guidance, as it relates to the project and methodology, is also followed. Note that the instructions in this template are intended to serve as a guide and do not necessarily represent an exhaustive list of the information the preparer should provide under each section of the template.*

*All sections must be completed using Arial 10pt, black, regular (non-italic) font. Where a section is not applicable, same must be stated under the section (the section must not be deleted from the final document).*

*All instructions, including this introductory text, should be deleted from the final document.*

*This is not the current version of this VCS program document. The current version is at:  
<https://verra.org/programs/verified-carbon-standard/vcs-program-details/>*

# MONITORING REPORT TITLE

## 1 PROJECT DETAILS

### 1.1 Summary Description of the Implementation Status of the Project

Provide a summary description of the implementation status of the project, including the following (no more than one page):

- A summary description of the implementation status of the technologies/ measures (eg, plant, equipment, process, or management or conservation measure) included in the project.
- The relevant implementation dates (eg, dates of construction, commissioning, and continued operation periods).
- The total GHG emission reductions or removals generated in this monitoring period.

### 1.2 Sectoral Scope and Project Type

Indicate the sectoral scope(s) applicable to the project, the AFOU project category and activity type (if applicable) and whether the project is a grouped project.

### 1.3 Project Proponent

Provide contact information for the project proponent(s). Copy and paste the table as needed.

Organization name	
Contact person	
Title	
Address	
Telephone	
Email	

### 1.4 Other Entities Involved in the Project

Provide contact information and roles/responsibilities for any other project participant(s). Copy and paste the table as needed.

Organization name	
Role in the project	
Contact person	
Title	
Address	

Telephone	
Email	

**1.5 Project Start Date**

Indicate the project start date, specifying the day, month and year.

**1.6 Project Crediting Period**

Indicate the project crediting period, specifying the day, month and year for the start and end dates and the total number of years.

**1.7 Project Location**

Indicate the project location and geographic boundaries (if applicable) including geodetic coordinates. For grouped and AFOLU projects, coordinates may be submitted separately as a KML file.

**1.8 Title and Reference of Methodology**

Provide the title, reference and version number of the methodology or methodologies applied to the project. Include also the title and version number of any tools applied by the project.

**1.9 Other Programs**

Include the following information, as applicable:

- Emission Trading Programs and Other Binding Limits: Where the project reduces GHG emissions from activities that are included in an emissions trading program or any other mechanism that includes GHG allowance trading (as identified in the project description, or where such programs or mechanisms have subsequently emerged) demonstrate that net GHG emission reductions or removals generated during this monitoring period have not be used for compliance under such programs or mechanisms. Examples of appropriate evidence are provided in the VCS Standard.

Other Forms of Environmental Credit: Indicate whether the project has sought or received another form of GHG-related environmental credit, including renewable energy certificates, during this monitoring period. Include all relevant information about the GHG-related environmental credits and the related program. Additionally, provide a list of all and any other programs under which the project is eligible to create another form of GHG-related environment credit.

- Participation under Other GHG Programs: Indicate whether the project is registered under any other GHG programs and, where this is the case, provide the registration number and details. Provide details of any GHG credits claimed under such programs.

This is not the current version of this VCS Program document. The current version is at: <https://verra.org/programs/verified-carbon-standard/vcs-program-details/>.

## 1.10 Sustainable Development

Describe how the project contributes to achieving any nationally stated sustainable development priorities, including any provisions for monitoring and reporting same.

## 2 IMPLEMENTATION STATUS

### 2.1 Implementation Status of the Project Activity

Describe the implementation status of the project activity(s), include information on the following:

- The operation of the project activity(s) during this monitoring period, including any information on events that may impact the GHG emission reductions or removals and monitoring.
- Where applicable, describe how leakage and non-permanence risk factors are being monitored and managed for AFOLU projects.
- Any other changes (eg, to project proponent or other entities).

### 2.2 Deviations

#### 2.2.1 Methodology Deviations

Describe and justify any methodology deviations applied during this monitoring period. Include evidence to demonstrate the following:

- The deviation does not negatively impact the conservativeness of the quantification of GHG emission reductions or removals.
- The deviations relates only to the criteria and procedures for monitoring or measurement, and do not relate to any other part of the methodology.

#### 2.2.2 Project Description Deviations

Describe any project description deviations applied during this monitoring period and explain the reasons for the deviation. Identify whether the deviation impacts the applicability of the methodology, additionality or the appropriateness of the baseline scenario and provide an explanation of the outcome.

Describe and report on any project description deviations applied in previous monitoring reports.

### 2.3 Grouped Project

For a grouped project, provide relevant information about new instances of the project activity(s) and demonstrate and justify how each new instance of the project activity(s) meets the eligibility criteria set out in the project description. Address each eligibility criteria separately.

**2.4 Safeguards**

**2.4.1 No Net Harm**

*Summarize any potential negative environmental and socio-economic impacts and the steps taken to mitigate them.*

**2.4.2 Local Stakeholder Consultation**

*Describe the process for, and the outcomes from, ongoing communication with local stakeholders conducted prior to verification. Include details on the following:*

- The procedures or methods used for engaging local stakeholders (eg, dates of announcements or meetings, periods during which input was sought).*
- The procedures or methods used for documenting the outcomes of the local stakeholder communication.*
- The mechanism for on-going communication with local stakeholders.*
- How due account of all and any input received during ongoing communication has been taken. Include details on any updates to the project design or justify why updates are not appropriate.*

**3 DATA AND PARAMETERS**

**3.1 Data and Parameters Available at Validation**

*Complete the table below for all data and parameters that are determined or available at validation, and remain fixed throughout the project crediting period (copy the table as necessary for each data unit/parameter). Data and parameters monitored during the operation of the project are included in Section 3.2 (Data and Parameters Monitored) below.*

Data / Parameter	
Data unit	<i>Indicate the unit of measure</i>
Description	<i>Provide a brief description of the data/parameter</i>
Source of data	<i>Indicate the source(s) of data</i>
Value applied	<i>Provide the value applied</i>
Justification of choice of data or description of measurement methods and procedures applied	<i>Justify the choice of data source, providing references where applicable. Where values are based on measurement, include a description of the measurement methods and procedures applied (eg, what standards or protocols have been followed), indicate the responsible person/entity that undertook the measurement, the date of the measurement and the measurement results. More detailed information may be provided in an appendix.</i>
Purpose of the data	<i>Indicate one of the following:</i> <ul style="list-style-type: none"> <li><i>• Determination of baseline scenario (AFOLU projects only)</i></li> </ul>

This is not the current version of this VCS Program document. The current version is at: <https://verra.org/programs/verified-carbon-standard/vcs-program-details/>

	<ul style="list-style-type: none"> <li>• Calculation of baseline emissions</li> <li>• Calculation of project emissions</li> <li>• Calculation of leakage</li> </ul>
Comments	Provide any additional comments

### 3.2 Data and Parameters Monitored

Complete the table below for all data and parameters monitored during the project crediting period (copy the table as necessary for each data unit/parameter). Data and parameters determined or available at validation are included in Section 3.1 (Data and Parameters Available at Validation) above.

Data / Parameter	
Data unit	Indicate the unit of measure
Description	Provide a brief description of the data/parameter
Source of data	Indicate the source(s) of data
Description of measurement methods and procedures to be applied	Specify the measurement methods and procedures, any standards or protocols to be followed, and the person/entity responsible for the measurement. Include any relevant information regarding the accuracy of the measurements (eg, accuracy associated with meter equipment or laboratory tests).
Frequency of monitoring/recording	Specify measurement and recording frequency
Value monitored	Provide an estimated value for the data/parameter
Monitoring equipment	Identify equipment used to monitor the data/parameter including type, accuracy class, and serial number of equipment, as appropriate.
QA/QC procedures to be applied	Describe the quality assurance and quality control (QA/QC) procedures to be applied, including the calibration procedures where applicable.
Purpose of the data	Indicate one of the following: <ul style="list-style-type: none"> <li>• Calculation of baseline emissions</li> <li>• Calculation of project emissions</li> <li>• Calculation of leakage</li> </ul>
Calculation method	Where relevant, provide the calculation method, including any equations, used to establish the data/parameter.
Comments	Provide any additional comments

### 3.3 Monitoring Plan

Describe the process and schedule followed for monitoring the data and parameters, set out in Section 3.2 (Data and Parameters Monitored) above, during this monitoring period, include details on the following:

- The organizational structure, responsibilities and competencies of the personnel that carried out the monitoring activities.
- The methods used for generating/measuring, recording, storing, aggregating, collating and reporting the data on monitored parameters.
- The procedures used for handling any internal auditing performed and any non-conformities identified.
- The implementation of sampling approaches, including target precision levels, sample sizes, sample site locations, stratification, frequency of measurement and QA/QC procedures. Where applicable, demonstrate whether the required confidence level or precision has been met.

Where appropriate, include line diagrams to display the GHG data collection and management system.

## 4 QUANTIFICATION OF GHG EMISSION REDUCTIONS AND REMOVALS

### 4.1 Baseline Emissions

Quantify the baseline emissions and/or removals, providing sufficient information to allow the reader to reproduce the calculation. Attach electronic spreadsheets as an appendix or separate file to facilitate the verification of the results.

### 4.2 Project Emissions

Quantify project emissions and/or removals providing sufficient information to allow the reader to reproduce the calculation. Attach electronic spreadsheets as an appendix or separate file to facilitate the verification of the results.

### 4.3 Leakage

Quantify leakage emissions providing sufficient information to allow the reader to reproduce the calculation. Attach electronic spreadsheets as an appendix or separate file to facilitate the verification of the results.

### 4.4 Net GHG Emission Reductions and Removals

Quantify the net GHG emission reductions and removals, summarizing the key results using the table below. Specify breakdown of GHG emission reductions and removals by vintages where the intent is to issue each vintage separately in the VCS registry system.

For AFOLU projects, include quantification of the net change in carbon stocks. Also, state the non-permanence risk rating (as determined in the AFOLU non-permanence risk report) and calculate the total number of buffer credits that need to be deposited into the AFOLU pooled buffer account. Attach the non-permanence risk report as either an appendix or a separate document.

Year	Baseline emissions or removals (tCO <sub>2</sub> e)	Project emissions or removals (tCO <sub>2</sub> e)	Leakage emissions (tCO <sub>2</sub> e)	Net GHG emission reductions or removals (tCO <sub>2</sub> e)
Year A				
Year...				
<b>Total</b>
